SUMMARY

Motivated DevOps intern with hands-on experience in CI/CD pipelines, containerization, and cloud infrastructure. Skilled in automating deployments with Docker, Kubernetes, Terraform, and Ansible across AWS and Azure. Seeking an internship to contribute to scalable, reliable, and automated infrastructure while growing as a DevOps engineer.

TECHNICAL SKILLS

CI/CD & Version Control: Git, GitHub Actions, GitLab CI, Jenkins, Bash
Containers & Orchestration: Docker, Kubernetes, Helm, docker-compose
Cloud Platforms: AWS (EC2, S3, VPC, IAM), Azure (VMs, AKS, App Services)
Infrastructure as Code: Terraform, Ansible, CloudFormation (basic)
Operating Systems: Linux (Ubuntu, CentOS), shell scripting, systemd
Monitoring & Logging: Prometheus, Grafana, ELK stack (basic)
Languages: Python, Bash, YAML, JSON

PROJECTS

CI/CD Pipeline for a Web Application

- Designed a GitHub Actions pipeline that builds a Docker image on every push, runs unit tests, pushes to Docker Hub, and auto-deploys to a staging server via SSH.
- Added automated rollback on failed health checks, reducing broken releases to near zero.

Kubernetes Deployment with Helm

- Containerized a multi-tier app with Docker and deployed it on minikube using Helm charts with ConfigMaps, Secrets, and Ingress.
- Configured Horizontal Pod Autoscaler and rolling updates to handle traffic spikes without downtime.

AWS Infrastructure with Terraform

- Provisioned a VPC, EC2 instances, load balancer, and RDS using Terraform modules, enabling repeatable and version-controlled infrastructure.
- Implemented remote state locking with S3 and DynamoDB for safe team collaboration.

Monitoring Stack with Prometheus & Grafana

- Deployed Prometheus, node-exporter, and Grafana using docker-compose to monitor server CPU, memory, disk, and uptime.
- Created custom Grafana dashboards and alert rules with Alertmanager for real-time incident notifications.

EDUCATION

B.Tech in Computer Science

Universal college of Engineering

- Relevant coursework: Operating Systems, Computer Networks, Cloud Computing, Databases.
- GPA: 7.5

- **CERTIFICATIONS**

- • Monitoring in Google Cloud — Google Cloud Skills Boost (Nov 2024)
- • Networking Fundamentals on Google Cloud — Google Cloud Skills Boost (Nov 2024)
- • The Basics of Google Cloud Compute — Google Cloud Skills Boost (Nov 2024)
- • Get Started with Cloud Storage — Google Cloud Skills Boost (Nov 2024)
- • Prompt Design in Vertex AI — Google Cloud Skills Boost (Nov 2024)
- • Develop GenAI Apps with Gemini and Streamlit — Google Cloud Skills Boost (Nov 2024)
- • Cloud Speech API: 3 Ways — Google Cloud Skills Boost (Nov 2024)
- • Analyze Images with the Cloud Vision API — Google Cloud Skills Boost (Nov 2024)

- **TRAINING**

- • Helm for Beginners — KodeKloud (Jul 2026)
- • Terraform Training Course — KodeKloud (Jul 2026)
- • Kubernetes: Hands-on Tutorial — KodeKloud (Jun 2026)
- • Docker Training Course — KodeKloud (Jun 2026)
- • Jenkins — KodeKloud (Jun 2026)
- • GIT for Beginners — KodeKloud (Jun 2026)
- • Python Basics — KodeKloud (May 2026)
- • Fundamentals of DevOps — KodeKloud (Mar 2026)
- • DevOps Pre-Requisite Course — KodeKloud (Mar 2026)
